TECHNICAL SKILLS

Data & Analysis: SQL, MySQL, MongoDB, Query Optimization, Data Validation

Programming: JavaScript, Python, C, C++

Web & APIs: REST APIs, Node.js, Express.js

Tools: Git, GitHub, Postman, Jira, Confluence

Core Strengths: Attention to Detail, Process Compliance, Issue Investigation, Documentation

PROFESSIONAL EXPERIENCE

Software Developer Intern

Jun 2025 – Aug 2025

Corporate Cruise

- Worked on backend systems involving structured data processing and validation workflows.
- Analyzed application logs and transaction-level data to identify inconsistencies and resolve issues.
- Followed defined procedures and documentation standards while implementing features.
- Collaborated cross-functionally to ensure accuracy, reliability, and timely delivery.
- Assisted in testing, defect resolution, and process improvements based on observed issues.

PROJECTS

Transactly – Backend Wallet System

May 2025

Tech Stack: JavaScript, Node.js, Express.js, MongoDB

- **Objective:** Designed a secure transaction processing system with strong validation checks.
- Built APIs to handle user authentication, transaction recording, and status verification.
- Ensured data integrity through schema validation and controlled workflows.
- Analyzed transaction flows to handle edge cases, errors, and inconsistencies.
- Tested scenarios using Postman to simulate failure cases and dispute-like conditions.

PhytoSense – Web Application for Plant Disease Detection

Nov 2024

Tech Stack: HTML, CSS, JavaScript, React.js

- Developed a user-facing system focused on clarity, usability, and accurate result presentation.
- Ensured correct data input handling and meaningful feedback to users.
- Worked on integrating frontend workflows with backend responses.

OLAP Sales Analysis System Using MySQL

Dec 2025

Tech Stack: MySQL, SQL

- Designed analytical data models for structured reporting and decision-making.
- Performed SLICE and DICE analysis to investigate trends and anomalies.
- Optimized queries to improve reporting accuracy and efficiency.

EDUCATION

National Institute of Technology Delhi

Aug 2022 – May 2026

Bachelor of Technology, Electronics and Communication Engineering

Relevant Coursework: Probability & Statistics, DBMS, SQL, Data Structures

CERTIFICATIONS & ACHIEVEMENTS

- SQL Certification – Basic, Intermediate, Advanced
- JavaScript Certification (Udemy)
- Winner – Tech Odyssey Hackathon (NIT Delhi)
- Top 10 Finalist – Fetchathon 2.0

LEADERSHIP & EXTRACURRICULAR

- Led logistics and coordination for Zeal 2024, managing operations for 500+ participants.
- Handled issue resolution, communication, and task tracking under time constraints.
- Executive Member, Photography and Film Club – Clairvoyance.
- Secured 3rd Place in Valorant Esports Tournament, demonstrating teamwork and decision-making.
