EDUCATION

National Institute of Technology Delhi — *B.Tech, Electronics and Communication Engineering* Aug 2022 – May 2026
Coursework: Probability and Statistics, DBMS, Data Structures, Operating Systems, Computer Networks

EXPERIENCE

PlaySuper — *Product Associate Intern, Gurgaon* Nov 2026 – Present
- Working directly with the founding and product team on the in-game store across data, product and experiments.

WizCommerce — *Product Management Intern, Bengaluru* Apr 2026 – Jul 2026
- Reduced CSM call prep from 35 to 4 min per account (about 90%) by shipping **CSM Hub** (Live), a client-health dashboard across 71 client domains used daily by 4 CSMs, designed around what they check before a call.
- Delivered 3 US client go-lives by owning launch readiness across homepage, product listing, product page, cart and checkout, logging 424 UAT test cases and ranking 20+ launch blockers by user impact.
- Converted client catalog gaps into dev-ready work via gap analyses against the data schema, PRDs, user stories and Jira tickets, and set up a scheduled AI agent sending weekday account-health digests to 3 CSMs and their lead.
  Tools: *React, Supabase, Gemini API, Upstash Redis, Claude Code + MCP connectors, HubSpot, Jira, Gmail, Gong, Slack*

Corporate Cruise — *Data Analyst Intern, New Delhi* Jun 2025 – Aug 2025
- Found a 15% lag against the ticket-resolution SLA by analyzing stage-by-stage turnaround times.
- Isolated 2 pipeline bottlenecks behind the lag and presented an improvement plan to leadership.
- Cut weekly KPI report prep time by about 40% with 100% accuracy over an 8-week compliance cycle by redesigning templates and automating validation.
  Tools: *Python, SQL, Excel*

PROJECTS

Bengaluru Renter's Copilot — Rental Deal Finder | Live | GitHub Aug 2026
- Launched a live deal finder for renters who can't tell if a listing is fairly priced, surfacing about 115 underpriced deals a week (15%+ below predicted rent) from about 1,500 listings across 40 localities (23.1% MAPE, down from 33%).
- Grew unique listings from 39 to 1,566 by fixing a location bug, and chose regex over an LLM for field extraction (90.2% vs 89.2% accuracy, 2,700x faster, free) after benchmarking Gemini Flash.
  Tech stack: *Python, Playwright, Telethon, SQLite, XGBoost, Gemini API, Streamlit, GitHub Actions*

Veritas — Interview Integrity Platform (InCruiter Hackathon) | GitHub Jul 2026
- Limited false alerts on honest candidates by requiring 2+ independent signals (gaze tracking, response timing, device probes, honeypot questions) before a HIGH alert.
- Made every alert reviewable with live WebRTC sessions, a real-time proctor console and per-session evidence logs.
  Tech stack: *Next.js, TypeScript, WebRTC, Socket.IO, MediaPipe, Prisma*

Credit Risk and Fraud Detection | GitHub Jun 2026
- Separated 150K borrowers into 3 risk tiers with a 22x default-rate spread (0.48% vs 10.57%) by creating 7 features and training XGBoost (AUC 0.868) with class weighting for a 6.7% default rate.
- Built a 4-bucket lending decision matrix with a 171x default-rate gap between Approve and Review by adding Isolation Forest and rule-based fraud checks (4x lift) behind a FastAPI scoring API.
  Tech stack: *Python, pandas, scikit-learn, XGBoost, Isolation Forest, FastAPI*

Zamp Nexus Analyzer — Sales-Tax Risk Tool | Live | GitHub May 2026
- Turned raw transaction CSVs into a state-by-state exposure map, filing deadlines and Gemini-written risk briefs, with auto-detected columns and a nexus-risk engine.
- Extended the MVP into a multi-client dashboard for accounting firms with secure login, critical-first portfolio sorting and portfolio-level AI briefs.
  Tech stack: *React, D3, Node.js, Express, Gemini API, Docker, Vercel*

SKILLS

Product: PRDs, user stories, requirements gathering, user research, product analytics (funnels and event tracking), A/B testing, UAT and launch readiness, root cause analysis, prioritization, stakeholder communication, cross-functional collaboration
Data: SQL (MySQL, SQLite), Python (pandas, NumPy, scikit-learn), Excel, Metabase, Power BI (DAX), XGBoost
AI and Tools: LLM APIs (Gemini, Claude), AI agents (Claude Code + MCP), React / Next.js, TypeScript, Node.js / Express, FastAPI, Streamlit, Playwright, Supabase, Docker, GitHub Actions, Vercel, Jira, HubSpot, Git

AWARDS AND CERTIFICATIONS

- **Winner,** Tech Odyssey Hackathon (NIT Delhi, inter-college).
- **Top 10 Finalist,** Fetchathon 2.0 (national data and ML hackathon).
- **Logistics Lead, Zeal 2024:** ran a 500+ attendee flagship event, coordinating 6 sub-teams and owning a multi-lakh budget.
- **SQL Certification (Advanced)**
- **JavaScript Certification** (Udemy)
