EXPERIENCE

WizCommerce — *Product Management Intern, Bengaluru* Apr 2026 – Jul 2026

- Cut CSM call prep from ~35 to 3–4 min per account (~90%), with daily use by all 4 CSMs, by replacing a noisy Slack-update first version with **CSM Hub** (Live), a pre-call brief and client-health dashboard unifying HubSpot, Jira, Gmail and Gong data across 71 client domains with LLM sentiment scoring.
- Delivered 3 US client go-lives, logging 424 UAT test cases and prioritising 20+ launch blockers by user impact with engineering, by owning launch readiness across homepage, product listing, product page, cart and checkout.
- Turned client catalogue gaps into build-ready engineering work by running gap analyses against the WizCommerce data schema and writing PRDs, user stories and Jira tickets.
- Automated weekday account-health digests for 3 CSMs and their lead by building a scheduled AI agent (Claude Code + MCP connectors to Slack, HubSpot, Jira, Gmail and a Gong-call knowledge base).

Corporate Cruise — *Data Analyst Intern, New Delhi* Jun 2025 – Aug 2025

- Identified a 15% lag against the ticket-resolution SLA and isolated 2 pipeline bottlenecks by analysing stage-by-stage turnaround times in Python and SQL, then presented a fix plan to leadership.
- Reduced weekly KPI report prep time by ~40% while keeping 100% accuracy over an 8-week compliance cycle by rebuilding reporting templates and automating validation in Python and Excel.

PROJECTS

Bengaluru Renter's Copilot — Rental Deal Finder | Live | GitHub Aug 2026

- Surfaced ~115 underpriced deals weekly from ~1,400 listings across 40 localities (23.1% MAPE, down from ~33%) by building a scrape → SQLite → XGBoost → Streamlit pipeline on a weekly schedule.
- Grew unique listing coverage from 39 to 1,566 by fixing a location bug, and chose regex over an LLM for field extraction (90.2% vs 89.2% accuracy, ~2,700x faster, zero cost) after benchmarking Gemini Flash.
  Tech stack: *Python, Playwright, Telethon, SQLite, XGBoost, Gemini API, Streamlit, GitHub Actions*

Credit Risk and Fraud Detection | GitHub Jun 2026

- Separated 150K borrowers into 3 risk tiers with a 22x default-rate spread (0.48% vs 10.57%) by engineering 7 features and training XGBoost (AUC 0.868) with class weighting for a 6.7% default rate.
- Built a 4-bucket lending decision matrix with a 171x default-rate gap between Approve and Review by adding Isolation Forest and rule-based fraud checks (4x lift), served through a FastAPI scoring API.
  Tech stack: *Python, pandas, scikit-learn, XGBoost, Isolation Forest, FastAPI*

Veritas — Interview Integrity Platform (InCruiter Hackathon) | GitHub Jul 2026

- Limited false alerts on honest candidates by requiring 2+ independent signals (gaze tracking, response timing, device probes, honeypot questions) before raising a HIGH alert.
- Made every alert reviewable via live WebRTC sessions, a real-time proctor console and per-session evidence logs.
  Tech stack: *Next.js, TypeScript, WebRTC, Socket.IO, MediaPipe, Prisma*

Zamp Nexus Analyzer — Sales-Tax Risk Tool | Live | GitHub May 2026

- Turned raw transaction CSVs into a state-by-state exposure map, filing deadlines and Gemini-written risk briefs by building automatic column detection and a nexus-risk engine.
- Extended the MVP into a multi-client dashboard for accounting firms with secure login, critical-first portfolio sorting and portfolio-level AI briefs.
  Tech stack: *React, D3, Node.js, Express, Gemini API, Docker, Vercel*

SKILLS

Product: PRDs, user stories, UAT and launch readiness, funnels and event tracking, A/B testing, root cause analysis, prioritisation
Data: SQL (MySQL, SQLite), Python (pandas, NumPy, scikit-learn), Excel, Metabase, Power BI (DAX), XGBoost, ETL
AI and Tools: LLM APIs (Gemini, Claude), AI agents (Claude Code + MCP), React / Next.js, FastAPI, Supabase, Vercel, Jira, HubSpot, Git

EDUCATION

National Institute of Technology Delhi — *B.Tech, Electronics and Communication Engineering* Aug 2022 – May 2026
Coursework: Probability and Statistics, DBMS, Data Structures, Operating Systems, Computer Networks

AWARDS AND LEADERSHIP

- **Winner,** Tech Odyssey Hackathon (NIT Delhi, inter-college); **Top 10 Finalist,** Fetchathon 2.0 (national data and ML hackathon).
- **Logistics Lead, Zeal 2024:** ran a 500+ attendee flagship event, coordinating 6 sub-teams and owning a multi-lakh budget.
- **Certifications:** SQL Certification (Advanced), JavaScript Certification (Udemy).
